

# Weekly report

## 1 Done.

### 1.1 RelationLine.

#### Paper:

- Adding citation.
- Replacing LBIRs.
- Adjusting the size of figures.
- Extending discussion about scalability.

#### System:

- Fixing mysql.
  - Some functions, like install or delete service can only be run with administrator privileges.
  - Editing the table user in the database mysql can create accounts and give permissions.
  - The account "root" has the highest privileges, but only local access.
  - I created an account that can access databases both locally and remotely. The local access is granted until I deleted a blank account generated by the system. These two accounts have a conflict.
- Fixing database. Ask Jun Chen for script to re-import data. The importing process need a quite long time.

### 1.2 Courseware

Adding cases.

### 1.3 Vis Presentation

Jia-Kai made a lot of suggestions for previous ppt draft. Combine with his suggestions, I improve the ppt.

- Adding real cases about privacy to introduce motivation.
- Adding related work.
- Adjusting the sequence of slides about models.
- Improving the introduction about models.

## 2 Progress

Item	Deadline	Current progress	Remark
RelationLine	8.31	Video left	Voice ready, data is still re- importing.
Courseware	9.1	Added cases.	Done.
Geo-privacy	9.29??	No progress.	-
Graph privacy	??	No progress.	-
